FOR LOVE OF THE WORLD

International Conference

20-21 September 2019

The theme of the conference, whose title is inspired by Hannah Arendt's thought, will concern the unprecedented and radical transformations that global challenges are producing at multiple levels. The conference will explore the three main dimensions (ecological, technological and socio-political) of the global age. In every session particular attention will be paid to the new theoretical and normative paradigms which could provide a response to the global challenges and pathologies of the contemporary world.
